

Through its Greystone® offering, ARCADIS provides expertise in environmental consulting, planning, science, and engineering with an emphasis on regulatory compliances, hazardous waste management, and environmental feasibility and impact assessments. Utilizing the Greystone® offering ARCADIS assists many clients including federal, state and local governments, in planning and environmental impact evaluation. Projects include mining, water development, pipelines, power generation, transmission lines, land development, and others. The Greystone® offering is varied, but can be generally described in terms of the following services:

- Environmental Impact Assessment
- Baseline Environmental Studies
- Mitigation Planning and Monitoring
- Feasibility and Scoping Studies
- Fatal Flaw and Siting Studies
- Planning and Permitting
- Permit Application and Document Preparation
